Mike, we do not contact or notify anybody but EPA of our milestones. We try to post weekly status reports on the website, but EPA reviews those first as well. The only other public notifications is to the boat clubs and high schools who use the river for their crew teams of barge movements and other in river activities that might affect them. Our community relations person sends the same information to the cities and counties on the river, but that is all. I do not know who the river keeper is. Sorry I can't help you on that.

Good afternoon,

I seem to recall that you notify the "river keeper" whenever there is a milestone or operational event at 10.9. Who/what is that person and if the person exists, what is their contact info (if you have it).

Thank you in advance.

Mike
